

Bespoke Industrial Covers

In addition to our Industrial Curtains and Screens for Heat retention, Wash down and Toxic Containment, Union Industries manufacture bespoke PVC coated polyester covers for Industrial and Commercial use.

Applications include:

Covers for Parking Ticket Machines, Intermediate Bulk Liquid Containers, Electrical Control Panels, Hopper Feeds, Trailers and Vehicle Sheets; Industrial machinery protection during transportation and storage; Lifting bags for heavy equipment and Warehouse end-of-isle recycling collection points.

All of our engineered fabrics are tailored to meet the individual customer requirements and our high levels of quality and workmanship has attracted customers including, but not limited to, Armed Forces, Local Governments and Blue-Chip companies such as Airlines, Supermarkets, and Manufacturers in the Oil, Food Processing and Transportation sectors.

All our bespoke covers are manufactured at our factory in Leeds, West Yorkshire, using our range of high quality, PVC coated fabrics which are available in a variety of colour options and properties depending on end use requirements. We can incorporate a wide range features and attach a variety of fixtures onto the fabric to provide Vision Panels for viewing; Doors and roll up sections for access; Mesh ventilation panels for air circulation; Lifting points and Carrying handles; Straps and anchorages to secure the covers in storage and transit, and Protection from dust and water.
